Premium 4-Way Pallet Truck

4-Way Pallet Truck

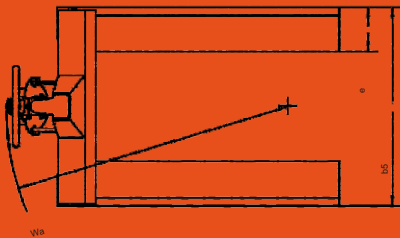

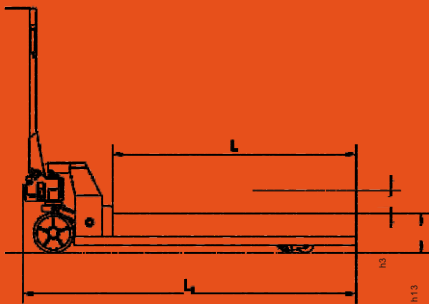

**Weight Capacity:
4400 lbs.**

WHY CHOOSE BETWEEN PRICE AND QUALITY WHEN YOU CAN HAVE BOTH

PREMIUM 4-WAY PALLET TRUCK

- This pallet jack is ideal for pallets with 4-way entry, as its unique fork design with its 2" minimum height allows the forks to fit into the side cut-out openings on four-way pallets.
- Truck allows maximum trailer load density, which usually restricts fork entry from adjoining pallets, and can also be used for standard two-way pallets and skids.
- Premium, industrial grade hydraulic pump raises and lowers skids or pallets smoothly and includes an overload bypass valve for safety.
- Pallet jack offers a 3-position fingertip control (raise, lower, neutral) and adjustable fork tie rods help keep proper fork alignment.
- 6.3" polyurethane steer wheels and 1.75" steel load wheels. 7" wide reinforced and tapered forks. 101° turning radius.
- Note: Distance between forks is 19".
