AC

3200-4000lbs

FE3D N Series

3-wheel Double Drive Electric Forklift

- 48 Volt Electrical TOTAL AC System
- All-Around Dual Front Wheel Drive
- Curtis Intelligent Computer Control System
- With On-Board Curtis Self-Diagnostics (IMS) Display
- Excellent Safety and Reliability
- Easy Service and Maintenance
- Smart Open Side Battery Access Door
- Great comfort and ergonomic design

AC

48 Volt Electrical TOTAL AC System with Low Maintenance Costs

The Total AC system design utilizes two AC drive motors and one AC hydraulic motor to achieve high performance with minimal costs. AC motors eliminate the need for motor brush or contactor checks or replacements, thereby greatly reducing overall routine maintenance costs. AC motors also provide high operating efficiency, long operating life, and longer run times than conventional DC type motors. The truck's power saving function enhances the truck's ability to operate for longer periods without reducing productivity or performance.

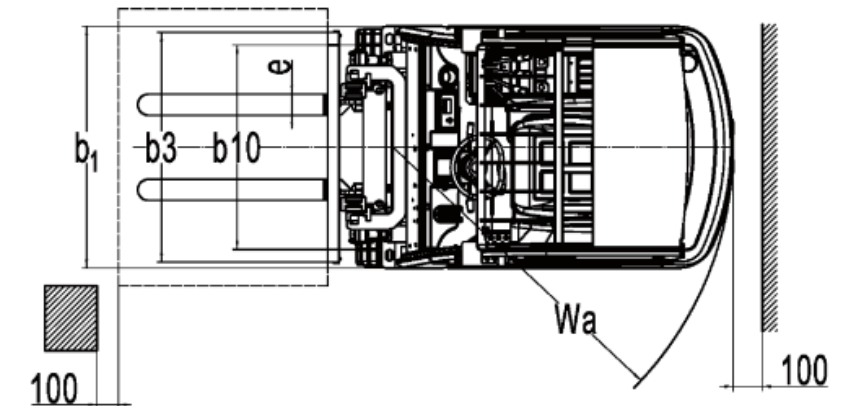

All-Around Dual Front Wheel Drive

All-around Dual AC front wheel drive motors for the N series provide powerful travel and excellent turning performance even in the most undesirable floor conditions. Stability of the truck is further enhanced through a low mounted battery keeping the truck center of gravity lower to the ground.

Curtis Intelligent Computer Control System

Advanced Curtis electronic controller regulates or monitors all required forklift functions in all situations and settings to assure the AC motor's best efficiency and performance. The Curtis easy Self-Diagnostics and Intelligent Monitoring System (IMS) display indicators is thoroughly tested to assure the highest standard of reliability of the forklift during its operation.

Excellent Safety and Reliability

The N series is equipped with the disc brake which improves brake control greatly in all applications situations. Unlike conventional drum and shoe braking systems that require periodic checks and maintenance so that total cost of ownership is also reduced.

Emergency power cut-off located at the right hand side near the control levers to ensure prompt emergency stop of the forklift under dangerous circumstance. Operator Presence Sensing System ensures that truck is operated only when the operator is seated to avoid incidents the parking brake is corrected applied whenever the operator leave the forklift.

Operator restraint system with retractable seat belt for safe operation.

Great comfort and ergonomic design for easy and comfortable operation

The N Series is designed with full consideration of the comfort and ergonomic of the operator to ensure the best efficiency and productivity is delivered with easy and comfortable operation. All lights are LED to ensure the best view in dark area operation. Small diameter steering wheel with spinner knob and on-demand Fully Hydrostatic Power Steering (FHPS) ensures effortless steering of the forklift during operation. Spacious step area with anti-slip design and a large hand grip for easy entry and exit.

Comfort Package including Rear Grab Bar with horn + Left & Right Rearview Mirrors + USB Connector + Deluxe Grab Bar + Deluxe Full Suspension Seat operation to make the job easier.

Easy Service and Maintenance Access

The N series offer gas-spring-assisted battery hood to make battery checks and maintenance easier to perform. Downtime is further reduced through the use of its Curtison-board self-diagnostic system that makes troubleshooting and repairs quick and simple. The controller is housed within a compartment designed to prevent the entry of dust, water and other possible contaminants, yet the cover can be removed for easy and quick service and maintenance.

Smart Open Side Battery Access Door

The N Series provides for several ways to easily remove or exchange the truck battery facilitating continuous multi-shift operations with its easy open side battery access door, so you can either replace the battery from side or hang from the top as most of the forklifts.
